SUMMARY

As a dedicated MERN Stack Developer, I excel at building user-friendly and advanced web applications using modern technologies. My goal is to continuously enhance my skills and expertise, aiming to become a proficient full-stack web developer within the next five years.

TECHNICAL SKILLS

- Frontend : React, Tailwind CSS, Javascript, Next.js
- Backend : Node.js, Express.js
- Database : MongoDB,
- Tools : Vs Code, Git, GitHub, Firebase

PROJECTS

HealthCare [Live Side](#) [Client Side](#) [Server Side](#)

Definition:

The Healthcare project is designed for patients. Here, you can easily book doctor appointments online without any hassle, make payments if required, and receive doctor consultations and treatments.

Technology : Next.js, Tailwind CSS, NextAuth, MongoDB, Next.js API Routes

Features:

- **Appointment Book & Payment:** Patients can easily book appointments online and complete payments securely using the SSLCommerz payment gateway.
- **Advanced Doctor Filtering:** Patients can easily filter products by doctor name, department, specialization and can select the right doctor.
- **Admin Dashboard:** The admin can view and manage all doctors and patients, and have complete control over the system.

EasyStore (Ecommerce Project) [Live Side](#) [Client Side](#) [Server Side](#)

Definition:

Created EasyStore, an e-commerce platform that enables users to easily order products online and pay easily through secure online options.

Technology : React.js, Tailwind CSS, Node.js, Express.js, MongoDB

Features:

- **Online Ordering & Payment:** Users can conveniently order products online and securely complete payments using the SSLCommerz payment gateway.
- **Advanced Product Filtering:** Users can easily filter products by price and brand for convenient shopping.
- **Admin Dashboard:** The admin can manage products, order history, analytics, and has full control over the system.

Precision Medical Camp [Live Side](#) [Client Side](#) [Server Side](#)

Definition:

This medical camp website is for providing services to various patients. Based on the specific problem of the patient, they can join the camp and get the necessary services.

Technology : React.js, Tailwind CSS, Node.js, Express.js, MongoDB

Features:

- **Dashboard:** The dashboard allows users to add and manage camps as well as oversee registered camps.
- **Easy Participant Access:** Participants can join camps, make payments, and access services with ease.
- **History & Payment Tracking:** Participants can view their camp history and payment status for better record-keeping and transparency.
